Affordable Interior Systems (AIS) reports to the Business and Institutional Furniture Manufacturer’s Association (BIFMA) on sustainability issues along with our continued participation in the Social Responsibility Report.

For the 2017 reporting year, we first looked back on our 2016 report. We then built off of it by looking into new areas of interest that most meaningfully demonstrate our goals of social responsibility along with environmental and economic sustainability.

The issues discussed in this report include social inclusiveness, diversity, employee health and safety, labor and human rights and community commitment. Environmental topics include energy and water consumption, waste management and greenhouse gas reduction.

This GRI Report has been internally reviewed by our Executive and Management Teams and includes information pertaining to AIS’ headquarters, showrooms and manufacturing facilities which are all located in the USA. Additional information about AIS is available on our website: www.ais-inc.com.

From the very beginning, AIS chose to be inventive and more efficient than our competitors. Over the years, AIS has remained as a small business that's not only flexible and easy to work with, but also able to be a large enough leader in the industry. Our products are innovative, durable and versatile, which is something we pride ourselves on. We are a company that is continuously looking to grow and evolve. In 2017, our sales increased exponentially and continue to do so.

In addition to our increase in sales, we’ve strived to increase our focus on the environment through small, ongoing changes. We believe that these small day-to-day changes are the way to create larger, longer-lasting changes. We strive to continuously become more efficient through lean manufacturing and use of the Kaizen method, which helps to drives our costs and material use down along with increasing efficiency and safety.

At AIS we have always been a leader in Lean Manufacturing. We strive to eliminate waste from our manufacturing processes every step of the way- the way Mother Nature Intended.

Since our 2016 report, we have maintained BIFMA Level Certification 2 for most products. AIS strives to continuously set and meet new goals. We believe any and all of our goals are achieved by starting with small ideas and changes that translate throughout the entire company.
Who is AIS?

AIS is a rapidly growing commercial office furniture manufacturer, specializing in systems, seating and casegoods. We boast one of the most impressive stories of growth and success in the office furniture industry. We have new and innovative approaches that lead the industry in sustainability, lean manufacturing, lead-time and manufacturing flexibility. AIS employs almost 600 people and occupies nearly 600,000 sq. ft. of manufacturing and operating space.

AIS has a new consolidated facility located on Tucker Drive in Leominster, MA. The 588,000 square foot plant is a state of the art manufacturing site, allowed AIS to consolidate six Massachusetts locations into one, increasing efficiencies and lead times.

AIS is known for offering product lines with a multitude of features that not only appeal to designers, but also meet immediate and future needs of end users while offering exceptional value. AIS is not just a local company, but we provide furniture to a wide range of customers all over the world from Maine to Guam and Puerto Rico to the United Arab Emirates.

The industries in which we provide furniture to include, but are not limited to: corporate, government, healthcare, higher education and non-profit organizations. Our products are used in start-up companies and universities, in Fortune 500 firms and the Pentagon.

Everyone at AIS, including our executive team, works together to make all of our customers, large and small, exceedingly satisfied with our work, product and our service. At AIS, there’s an “Open Door” policy that is widely used where anyone, from any department, can directly contact our executives to suggest recommendations or ask for project approval. In addition to directly speaking to an executive board member, they are also available via e-mail, phone, conferences and at annual board meetings to discuss the direction of the company. AIS also maintains appearances on social media through our corporate Facebook and Twitter accounts to stay in tune with the needs of any stakeholder group.

AIS can assist with this credit for projects within a 500 mile radius of Leominster, MA.

The green circle represents a 500 mile radius around the center point, Leominster, MA, and includes the geographic region eligible for this LEED credit.
AIS History

1989
Founded as Affordable Interior Systems, supplier of remanufactured office workstations

1992
Relocated to 80,000 sq. ft. facility in Hudson, MA, quickly becoming one of the largest & most respected re-manufacturers in the U.S.

1996
Management team sold 100% of stock to USOP/ Shift occurs from focusing on remanufacturing to an all new manufacturing model
Introduced new product lines, MWall and AO2

1999
Management team buys back company from USOP

2001
Quickly aided Pentagon workers after Sept. 11th (2300 workstations)
J.D. Power and Associates selects AIS products for their worldwide headquarters

2002
Introduced Matrix, first AIS branded product

2003
Awarded Shingo Prize for Excellence in Lean Manufacturing
Recognized by Industry Week magazine as one of the top 25 manufacturing plants in North America
2005
Introduced Element mesh seating line
Matrix earned GREENGUARD certification

2007
Introduced Divi segmented & monolithic panel system
Divi, MWall, and AO2 achieve GREENGUARD certification

2008
Recipient of OFDA’s Bronze Non-Aligned Manufacturer of the Year award

2009
Recipient of OFDA’s Silver Non-Aligned Manufacturer of the Year award

2010
Recipient of OFDA’s Gold Non-Aligned Manufacturer of the Year award

2004 - 2010

2011
Recipient of OFDA’s Gold Non-Aligned Manufacturer of the Year award
Introduced Calibrate benching & desking line

2012
Recipient of OFDA Manufacturer of the year, 3rd consecutive year winning top honor.
All AIS systems products earn BIFMA Level certification

2013
AIS awarded Best of NeoCon, Silver award for its new Oxygen Benching line
Recipient of OFDA Non-Aligned Manufacturer of the Year

2014
AIS awarded Mass Econ Award
Recipient of OFDA Non-Aligned Manufacturer of the Year

2015
AIS awarded Best of NeoCon Silver award for its new Aloft height adjustable benching
Recipient of OFDA Non-Aligned Manufacturer of the Year

2017
AIS completes move of manufacturing facilities and corporate headquarters to Leominster, MA
Recipient of OFDA Non-Aligned Manufacturer of the Year
Recipient of AIM Sustainability Report
Our People

AIS is very committed to protecting and respecting the fundamental human rights of our employees, while also maintaining compliance with all local, national and global laws and norms concerning the protection of those rights.

We are advocates for developing a strong and diverse workforce. AIS values and encourages all employees to bring forward their suggestions and ideas about how our company can be improved. This includes how our company can be a better place to work, product improvements and how to enhance our customer service.

At AIS we work in a very cooperative environment. We have an open workspace that allows coworker collaboration. This also supports intra-department collaboration along with the ability to easily work and communicate with other departments.

"If I had to put it in one word, it’s ‘passion’. It’s the culture that we have that we try and build day in and day out through the entire organization."

AIS Community Investment

At AIS, we count on the community mindedness of our time to exhibit and display an attitude of respect, with regard to each other, our stakeholders and most importantly, to the way we do business.

We are devoted to helping the surrounding communities in which we operate. To be able to make this happen, it involves the time, skills and help from our employees. At any time, our employees can provide input on programs or charities they would specifically like to volunteer for or donate to. This is just another part of our "open door policy". Some of the work we’ve done is described below and on the following pages. This is just the tip of the iceberg when it comes to how we make an effort to support and be apart of our communities.

In 2017, AIS donated just over $90,000 to charities and programs that greatly benefited our local and national communities.
AIS Employee Events

In 2017, the AIS Boost program, participated in several events to support and raise money for both local and national community outreach programs. The AIS Boost program engages all of AIS employees to participate in various community outreach events during the year.

In September 2017, in response to the unprecedented flooding in Texas and Louisiana, AIS collected cash donations from employees which AIS matched dollar for dollar. The funds were used to purchase goods in high demand within the impacted areas. Supporting documentation is presented below.

On January 19th, 2017, 14 AIS employees participated in the Meal Packaging Event as part of United Way’s Combat Hunger relief campaign. A picture from the event is presented in the supporting documentation attached. The Mission of the United Way is to: Create opportunities for a better life through innovative leadership that improves the human condition by mobilizing the caring power of the community. Further information on United Way can be found at: http://www.uwncm.org/

Throughout 2017, 9 AIS employees volunteered their time as mentors at the Pierce Street School and received a Certificate of Appreciation, through the Partnering for Literacy program with United Way. AIS also made 25 ped cushions in a white vinyl and donated 3 to 7 classrooms along with a package of markers for students to decorate and use within the classroom. For more information on the Partnering for Literacy program through the United Way, refer to: http://www.uwncm.org/why-it-important

The Semper Fi Fund provides immediate financial assistance and lifetime support to post-9/11 wounded, critically ill and injured members of all branches of the U.S. Armed Forces, and their families, ensuring that they have the resources they need during their recovery and transition back to their communities. For more information on the Semper Fi Fund, refer to: https://semperfifund.org/
Inclusiveness & Diversity

At AIS, we’re advocates of developing a strong, diverse workforce. We promote a culture in which our employees are encouraged to strive for excellence and where their opinions and talents are nurtured. At AIS, every individual is treated equally and will not be discriminated against in receiving services, compensation, opportunities for advancement (including promotions and transfers), training or discipline.

Employee Breakdown by Gender and Race

Male Workforce: 69%  Female Workforce: 31%

- American Indian or Alaska Native
- Asian
- Black or African American
- Hispanic or Latino
- Native Hawaiian or Pacific Islander
- Two or More Races
- White
Employee Health & Safety Management

At AIS, we believe that every person is entitled to a safe and healthy environment in which to work. We have a basic responsibility to make the safety of our employees our concern because our employees are our most valuable assets. Therefore, safety is everyone’s business and is given primary importance in every aspect of planning and performing all activities at AIS. This allows for our employees to be protected against industrial injury and illness.

For the protection of our employees, we have an in-house safety committee while also utilizing an outside safety consulting firm. While establishing an initial safe atmosphere is very important, we also continue to maintain and grow the policies and procedures set in place. A safe working environment is a shared responsibility between AIS and its employees at all levels of the organization.

In 2017, we had 20 reported injuries including, but not limited to: muscle strains and sprains, cuts, irritation and bruises. There were 322 total days away from and work and 0 cases of occupational diseases and work related fatalities.

We have a Kaizen project, called the ‘Before and After’, at AIS that we incorporate into every aspect of our company, but one of the main focuses is health and safety. The definition of Kaizen is “a Japanese business philosophy of continuous improvement of working practices, personal efficiency etc.”

Labor & Human Rights Management

One of the primary goals at AIS is to successfully meet its responsibilities to our employees, both as individuals, and as contributing members of AIS. This is accomplished by managing AIS in such a way that our people not only deserve, but they will always be treated with respect in any and all situations. We believe this principle helps to make AIS as successful as it already is and will continue to do so in the future.

AIS pays, at minimum, entry level wages that exceed the local and legal minimum wages at all of our operations. Our employees are not represented by a labor union; however, AIS’s policy is to provide wages and benefits that compare favorably with those at other companies in our region and industry.

All of our full-time employees receive a benefits package that includes: paid holidays, vacation time, paid leaves such as bereavement leave and jury duty, health and dental insurance, retirement (401k) plan and life insurance. In addition to these standard employee benefits, we also provide our employees with opportunities for professional and personal growth and development. This includes training seminars and tuition reimbursement programs. Employee reviews are performed annually for all AIS employees and promotions are based solely on performance and production.

They are a really special group that’s incredibly dedicated and incredibly hard working and it makes it kind of a joy to come in each day and know that everybody has the same passion and understand the same goal that we’re all working towards.
AIS Products

Systems
Matrix and Divi create sophisticated flexible workspaces that withstand the test of time. Matrix offers robust electrical capabilities as a full frame and tile panel system, allowing data and power to run every 8” in height. Divi’s universal hinge system keeps installation costs down, without sacrificing design or quality. With Matrix and Divi, you can create the perfect environment, meeting the demands of today’s technologically charged workforce. SCS Indoor Air Quality GOLD certified and designed for reuse, these panel systems can construct any configuration including open plan, private offices, reception areas, conference rooms and more. When coupled with Calibrate components and accessories, work areas become collaborative and modern with a twist of elegance.

Desking & Benching
Oxygen and Aloft provide an unparalleled aesthetic and functional flexibility for customers that spire to a modern, open workplace environment. Both products feature a structural spine beam support which accommodates multi-circuit electrical as well as routing and termination for data cables, complemented by worksurface apertures for ease of user access. A rigid steel framework with telescoping rails supports worksurfaces and storage elements while minimizing the number of parts required by adjusting to different field conditions. Aloft’s height adjustability allows the user to create a dynamic workspace to promote health and wellness. Oxygen and Aloft are Best of NeoCon winners.

Casegoods
This comprehensive line of laminate desking and storage was designed to support a wide range of users and a variety of work environments. With an extensive selection of finishes, hardware options, and styles to choose from, it’s easy to create meaningful and beautiful workspaces. Plus, Calibrate integrates with all of our AIS Systems. Whether creating a private office, collaborative space, or integrating into the open plan, you’ll appreciate all the Calibrate Series can do.

Seating
From private offices to collaborative spaces, AIS has the ideal seating for any type of office environment. A versatile offering that consists of executive, task, multi-purpose, side chairs and stools, the AIS lineup provides the seating solutions that you need at the right price.
Commitment to Sustainability

Our goal is to support a healthy, sustainable and natural environment for present and future generations. We manufacture products with a high recycled content that are Indoor Air Quality Certified and are designed for future re-use.

As part of the AIS Lean manufacturing philosophy, we have analyzed our manufacturing streams thoroughly and cut waste from every possible angle—the way Mother Nature intended. Although we have been able to reduce our electricity and gas usage substantially, we’re always looking for new ways to reduce and even reuse these.

We manufacture, travel and produce products, so we regularly have a relatively large carbon footprint. We’re always thinking outside of the manufacturing walls and researching new ways to offset our impact. Currently, we’re achieving this by investing in alternative energy solutions and emerging green technologies.

I think in terms of sustainability, the corporate focus to make sure that the products have a life after their use in the office environment is important.

AIS has partnered with a company called ANEW. They specialize in finding a reuse for furniture at its end of life. The amazing and innovative company matches the surplus or unwanted furniture with non-profits, public agencies and under-served communities to avoid landfills. ANEW removes surplus and used furniture in any condition and then reuses, resells and repurposes it within a 50-mile radius.

Our hope is that the effects that future generations may have to endure, due to social irresponsibility, could be avoided if we all join forces and take action to make a positive impact. This would leave behind a legacy of preservation, rather than one of destruction and depletion.

Our Environment

As a manufacturer, employer and community member, AIS’ responsibility for our future extends well beyond the walls of our operations. While the future remains untold, concept of sustainability, prosperity and progress will only be realized through continuous transformation. AIS is taking a leading role in that evolution as we minimize our impacts while fostering healthy and productive environments.

Our transformation includes:

- Continuing to develop our environmental management system to identify, assess, manage and reduce our impacts on the environment.
- Development of DfE group that gathers members from every department at AIS to discuss environmental practices while also creating new goals to meet on a yearly basis.
- Continuing the development of durable products that are designed for long and useful lives
- Partnership with Asset Network for Education Worldwide (ANEW) for the continued use of the take-back program used for AIS office furniture and products
- Assessment, management, conservation and offsetting of our energy consumption and greenhouse gas emissions
- Commitment to shareholder engagement through public reporting of our energy and GHG emissions through the Carbon Disclosure Project and Global Reporting Initiative
2003 - Awarded Shingo Prize for Excellence in Lean Manufacturing

2005 - AIS products begin to achieve GREENGUARD certification

2007 - Divi, MWall and AO2 achieve GREENGUARD certification

2008 - Recipient of OFDA’s Bronze Non-Aligned Manufacturer of the Year Award

2009 - Recipient of OFDA’s Silver Non-Aligned Manufacturer of the Year Award

2010 - Recipient of OFDA’s Gold Non-Aligned Manufacturer of the Year Award

2011 - Recipient of OFDA’s Gold Non-Aligned Manufacturer of the Year Award

2012 - AIS products earn BIFMA Level certification

2013 - Recipient of OFDA’s Gold Non-Aligned Manufacturer of the Year Award

2014 - Recipient of OFDA’s Gold Non-Aligned Manufacturer of the Year Award

2015 - Recipient of OFDA’s Manufacturer of the Year Award for Workstations/Systems & Casegoods

2016 - Recipient of OFDA’s Manufacturer of the Year Award for Systems, Seating & Casegoods

2017 - Recipient of OFDA’s Manufacturer of the Year Award for Systems, Seating & Casegoods
Energy Consumption

Below you will find our Energy and Greenhouse Gas performance metrics, including the amount of energy consumed and greenhouse gases emitted by AIS as a whole:

(MMBTU)

Total Emission (tCO2e)
Design for Durability & Longevity

Design for Environment

In addition to our design philosophy, is the notion that the greatest opportunities for reductions in environmental impact occur during the design phase. It's during this stage that many of the life cycle impacts will be determined. Our design for the environment program ensures that the selection of materials, construction methods, manufacturing operations and product use are carefully considered for their potential impacts upon the environment.

Design for Durability and Longevity

At AIS, we design and manufacture products from materials that will last and stand the test of time. In order to achieve this, nearly all of AIS’ products are designed to be used in multiple configurations. We have reusable parts and pieces that can be used between many of our systems lines that help to be able to reconfigure and redesign the same furniture over and over. In addition, this aids in the longevity of the product use.

Product End of Life

In the event that any of our products meet the end of their useful life, we provide disassembly instructions, which are available online, to assist our users in efficiently and effectively breaking down the product. Once this has been done, the user has the option to either recycle or reuse the product. In addition, we're partnered with a company called ANEW. They have the ability to come to any site where our furniture is located and tear down and take away unwanted furniture. ANEW then seeks a new life for used furniture through donations of surplus. Many of this furniture is then donated to charitable organizations, public agencies and the underserved.

Product End of Life and ANEW

AIS has partnered with ANEW to provide a take-back solution for surplus office furniture and materials. This partnership provides AIS clients with a means to repurpose their furniture, fixtures and architectural materials, diverting the items from landfill. All captured materials are donated to public agencies and charities within a 50 mile radius, benefiting the local communities to which the furniture resided.

Who is ANEW?

ANEW (Asset Network for Education Worldwide, Inc.), a 501 (C)(3) non-profit organization, provides companies with sustainable alternatives for their surplus furniture and other items with the priority of matching it to non-profits, public agencies and underserved communities to avoid landfill. This simple practice furthers corporate citizenship, social responsibility and environmental sustainability. ANEW is doing what's right by extending the life cycle of surplus items through reuse, resale and repurposing; what's left is recycled and considered for energy-from-waste. ANEW is a single point resource, coordinating the removal of all surplus in any condition from the interior built environment, conducting community outreach to charities and others, then reporting the results and metrics of every project. ANEW educates through action; transforming surplus into service.

For more information visit: anewfound.org
At AIS, we want all of our employees to be active members in our effort to reduce our CO2 emissions. The only way to do that is to educate and inform everyone on how to do this. We have a board posted in a general location at our Hudson, MA headquarters that give tips and guides on how to reduce their own personal emissions. In addition, there is a monthly newsletter sent out to all AIS employees as to how to reduce CO2 emissions by taking small steps. All it takes is for one person to start a reaction and create a chain.

You may have heard of the phrase ‘a tracked number grows’ when referring to sales or savings; well, the same goes for any goal you’d like to reach. If you start tracking your goals, you’re more likely to reach them. AIS outlines a few goals each year, which are called Key Performance Indicators, or KPI’s, to help us stay accountable and conscientious of sustainability, safety, and our overall well being.

Our KPI’s for 2017 were:

Energy & GHG Emissions improve reductions by 5% over Baseline by 2020
Transportation: Increase Shipping efficiencies through product and packaging consolidation by 5% by 2022
Reduce Annex B chemicals within process lines by 10% by 2025
Solid Waste: Increase solid waste recycling 25% by 2025
